## Research Uptake: a rapid introduction

## Research uptake: a joint effort

.....

#### The NL research for development frame work:

## What is research uptake?

We used to talk about Research Dissemination

### Today it's Research Uptake

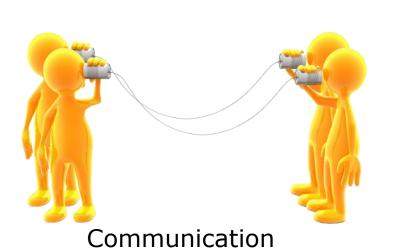

"Research uptake includes all activities that facilitate and contribute to the use of research evidence by policy-makers, practitioners and other development actors" (DFID Research Uptake Guide 2013)

### Four main strands

Stakeholder engagement

Monitoring & Evaluation

## Stakeholder engagement

- Identify the relevant stakeholders
- How to engage and keep engaged with these stakeholders

## Capacity development

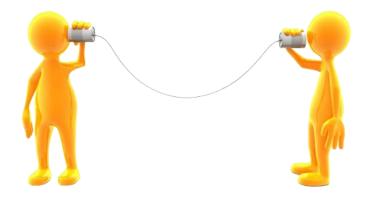

- Assessing the capacity to effectively engage:
  - Internal = within team: e.g.communication, managing knowledge
  - Stakeholders (dis)incentives, interests)
- Capacity building:
  - Getting trained (team)
  - Providing training
  - Seeking support(e.g. to faciltate)

#### Communication

- Science base: synthesise existing knowledge
- Peer reviewed articles-quality check
- Packaging and communicating to non-experts... and

...... Include feedback and adapt

## Monitoring and Evaluation

- Include the (evidence of the) use of research findings in your M&E frame (impact pathway)
- Strategy to learn from research uptake activities

## Research Uptake: why is it so difficult?

I'm a researcher, not a press officer

- Incentives?
- Skills?
- Budget?
- Planning?
- Comfort zone?
- Time?
- Burnt fingers?

## What does effective research uptake look like?

## Top Tips on Research Uptake

Geoff Barnard - 2014

# No.1 Get to know your context really well

The policy soup

- Theory of change/Impact pathway
- RAPID framework

#### **External Influences**

Socio-economic and cultural influences, donor policies etc

The **political context** – political and economic structures and processes, culture, institutional pressures, incremental vs<sub>1</sub>radical change etc.

The **links** between policy and research communities – networks, relationships, power, competing discourses, trust, knowledge etc.

The **evidence** – credibility, the degree it challenges received wisdom, research approaches and methodology, simplicity of the message, how it is packaged etc

## No.2 Narrow down your primary audience

## A common mistake

- Being vague
- Trying to reach everyone

and as a result

Failing to reach anyone

## Identifying audiences

## Alignment, Interest and Influence Matrix (AIIM)

- 1. Identify all stakeholders
- 2. Map them onto the alignment / interest matrix
- 3. Identify who has power
- 4. Identify who you can influence

High

General level of alignment

Develop Learn in enthusiasm to partnership address topic Develop Challenge awareness existing beliefs and enthusiasm High

Low

Interest in specific topic

Where have you got leverage?

Low

# No.3 Really get to know them

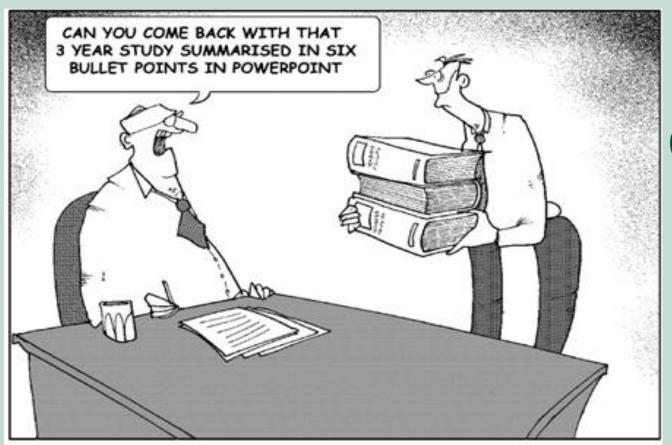

## How to win friends and influence people

- Start early
- Invite them onto your steering group
- Listen and learn about their agendas/challenges
- Roundtable events
- Field visits
- Secondments, exchanges, advisory panels
- Games

## No.4 Distil your message,

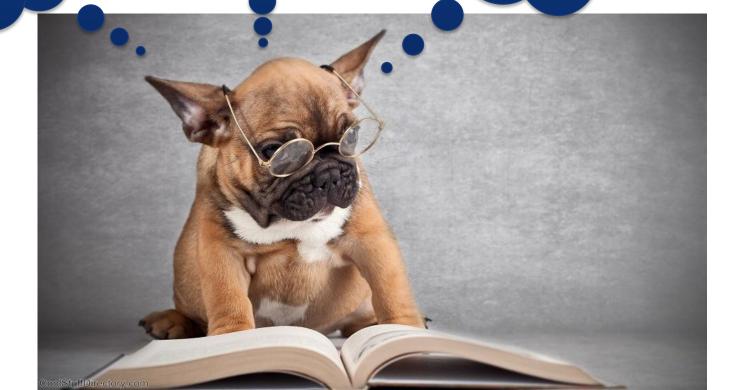

then distil it again

## Attention spans are very small

Why am I reading this?

Come on, get to the point

This is hard work, I think I'll go and chase that cat

## No.5 Target your communication

## Draw up a targeting matrix

Audience	Journal Article	Policy Brief	Video	Media article	Face- to-face	Trainin g module	Social media
The Minister							
Minister's advisors			You car	n't do al	l of thes	<u>e</u>	
Donor agency			well.				
Field staff				ones do entrate	you wai on?	nt	
Academic peers							
etc.							

No. 6 Use others to amplify your message

## Types of knowledge brokers

#### **Journalists**

- International
- National
- Local
- Community

#### **Networks**

- Topic related
- Professional
- Communities of interest

#### Other websites

- Blogging sites
- Portals
- Climate Knowledge Brokers Group

# No. 7 Go to where the action is

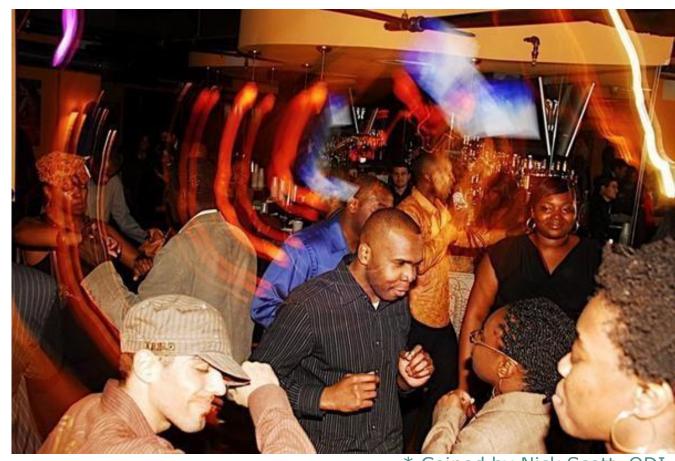

Don't expect people to always come to you

## A "Being There\*" strategy

- Attend and speak up at key meetings
- Publish on other websites
- Follow and comment in social media
- Go to other people's parties (and don't hide in the corner!)

\* Coined by Nick Scott, ODI

# No.8 Identify windows of opportunity

## **Grabbing those chances**

good planning good antennae good networks opportunism a clear message a bit of luck

A much better chance you'll have some impact

## In Summary:

1. Get to know your context

5. Target your communications

2. Narrow down your audience

6. Use others to amplify your message

3. Really get to know them

7. Go to where the action is

4. Distil your message

8. Identify windows of opportunity

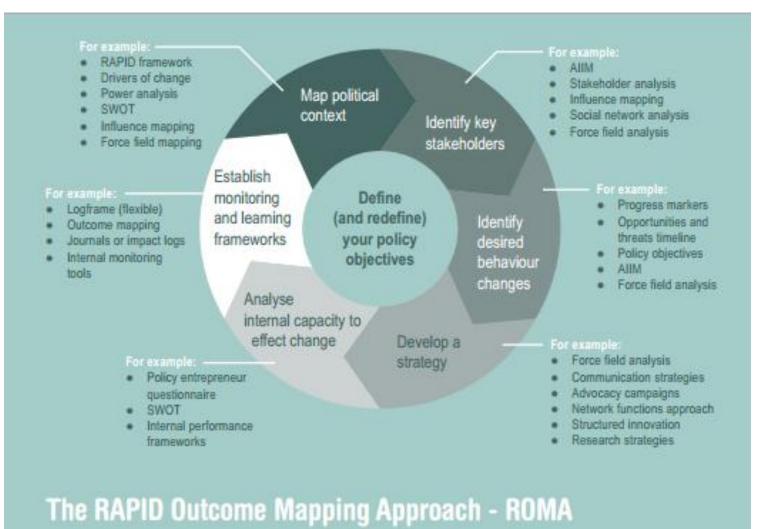

# No. 9 Be strategic, but be prepared to adapt

## Useful strategy tools

## Thank you!
